

APÉNDICE VIII.44

Lista de especies de aves del estado de Veracruz

Compilada por Sergio H. Aguilar Rodríguez y Julio C. Gallardo Del Ángel

Se presenta en orden descendente el nombre común, científico y en inglés. La lista fue tomada con modificaciones de Loetscher (1941, 1955), Lowery y dalquest (1951), Martínez-Gómez (1992). El orden taxonómico, la nomenclatura científica y los nombres en inglés de esta lista son los propuestos por la Unión Americana de Ornitólogos (AOU, 1998; AOU, 2000; Banks *et al.*, 2002, 2003, 2004, 2005); el nombre en español es utilizado por Escalante *et al.* (1996); y la categoría de protección por la NOM-059-SEMARNAT-2001 (Semarnat, 2002). El hábitat se refiere el tipo de vegetación propuesto por Rzedowski (1981) y tomado de Pelcastre-Villafuerte y Flores-Villela (1992).

CLAVES DE LA LISTA:

Hábitat (HAB)

Bt: Bosque tropical perennifolio
Bs: Bosque tropical subcaducifolio
Bc: Bosque tropical caducifolio
Be: Bosque espinoso
Bq: Bosque de *Quercus*
P: Palmar
Za: Pastizal o zacatal
Va: Vegetación acuática y subacuática
Vh: Vegetación halófila
Bm: Bosque *mesófilo* de montaña
Bp: Bosque de coníferas
Mx: Matorral xerófilo

Alimentación (DIE)

Va: Vegetación acuática
Ve: Vertebrados terrestres
Pe: Peces
Int: Invertebrados terrestres
Ina: Invertebrados acuáticos
Ca: Carroña
Fr: Frutas
Ne: Nectar y savia
Se: Semillas

Categoría NOM (CAT)

Pr: Protección especial
A: Amenazada
P: En peligro de extinción

Estatus de la especie (ESA)

En: Endémica
Ex: Exótica, especie introducida
Et: Extirpada
Ea: Extinta

Estacionalidad (EST)

RR: Residente reproductivo
RN: Residente no reproductivo
RV: Residente de verano
TR: Transitorio
VI: Visitante de invierno
IN: Indeterminada

* Se refiere a que las especies no tenía un nombre en español designado por Escalante *et al.* (1996) y en su caso se usó el propuesto en Kaufman (2005).
